Can I use any browser?

Last Modified on 10/06/2015 8:02 pm MST

DecisionDirector is browser-independent, and has been tested to work with the current versions of all major browsers.

If you are running an older version of IE, though, you might need to try either a newer version, IE 10 or IE 11, or try Chrome or Firefox, instead.

One exception: copy-and-paste of images from MS-Word works best when using IE 11. See [Pasting MS-Word Content from IE 11](#) and [Pasting MS-Word Content from Chrome (or Firefox).](#)
