

How Do We Get our Procurement Documents Loaded Into DecisionDirector?

Last Modified on 03/15/2016 9:58 am MST

We are happy to assist our clients in loading their procurement documents into their DecisionDirector library. Examples of documents that can go into DecisionDirector:

- RFP Template
- Standard Terms and Conditions
- Special Terms and Conditions
- Pricing Forms
- Vendor Questionnaires
- Accessibility Compliance Forms (WCAG and Section 508 VPATs)
- and more

Once these are loaded into DecisionDirector, they can be used again and again for each procurement, and are easily customized to meet the specific needs of those procurements.

We will also assist our clients in configuring the documents to collect the desired responses from bidders. And while we are doing this, we will also train client personnel to do this for themselves.
